

Senior Project Manager, Deep Excavation, Westerra

What we are about:

At Westerra Enterprises, our number one priority is the safety of our staff. With careful intention, we have created a health & safety conscious company that we are proud of. We follow a comprehensive health and safety program that reflects our industry's Occupation Health & Safety Standards and includes a Certificate of Recognition (COR) from WorkSafeBC and the BCCSA.

Our client relationships are held in high regard, as without you, we would cease to exist. That's why we ensure that we are working with integrity and providing you with quality workmanship every step of the way. You can rest easy knowing that we will create a plan tailored specifically to your project needs and timeline.

DEEP EXCAVATION PROJECT ESTIMATOR:

ROLE: The Deep Excavation Project Estimator will, in coordination with Vice President, use site visits and client/contractor outreach to accurately estimate costs of materials, labour, equipment and take-offs for excavation projects based on contract bids, quotations, tender drawings and all other project specifications. He or she will be able to comfortably recommend cost reduction or project success strategies where appropriate. The ideal candidate will be highly skilled in interpersonal communication skills, easily building and maintaining long-term relationships with key clients.

REPORTS TO: CEO, General Manager
